

Mission of Asian Consortium of Volcanology

Objectives

Asia is one of the most populated areas both in human beings and volcanoes. We are always faced with violent volcanic disasters and it is necessary to coexist with volcanoes for our sustainable developments in Asian region. Here, we establish "Asian Consortium of Volcanology (ACV)" for the promotion in volcanology in Asian countries/regions through the collaboration between volcanologists and authorities. The members will cooperate in one or more missions below.

1. Sharing the scientific and technological knowledges in volcanology.
2. Sharing the experiences of volcanic disaster and strategies of hazard mitigation.
3. Encouraging young volcanologists through the scientific lectures, trainings and projects.
4. Promotion collaboration with the international projects and databases.
5. Annual field camps.

Participation

ACV has core-member organizations (CMO) in each Asian country and its corresponding member. The core-member meeting (CMM) is composed of these core-member organizations and discusses on the operation of ACV, including the selection of president and secretary general, collaborative investigation projects, field camp plans, information dissemination and financial plans.

Each core-member organization will inform the ACV activity to its local volcanological community and call for the participation.

Those which countries have no core-member organizations will make contacts to the core-member-organization, and the core-member meeting will authorize the participation.

Appendix A: Core-member organizations and corresponding staff (Nov. 9th, 2023)

Singapore: Earth Observatory of Singapore, Nanyang Technological University

Prof. Benoit Taisne

Indonesia: Centre for Volcanology and Geological Hazard Mitigation

Prof. Hendra Gunawan

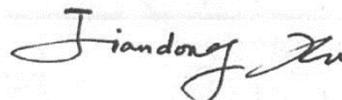

Philippine: Philippine Institute of Volcanology and Seismology

Prof. Ma. Antonia Bornas

China: China Earthquake Administration

Dr. Jiandong Xu

Hong Kong: The University of Hong Kong

Prof. Weiran Li

Taiwan: Taiwan Volcano Observatory-Tatun

Prof. Cheng-Hong Lin

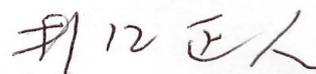

South Korea: Volcano Specialized Research Center

Prof. Sung-Hyo Yun

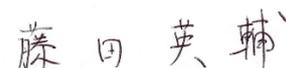

Japan: Sakurajima Volcano Observatory, Disaster Prevention Research Institute, Kyoto University,

Prof. Masato Iguchi *

National Research Institute for Earth Science and Disaster Resilience #

Dr. Eisuke Fujita **

*: President, **: Secretary General, #: Secretariat
